Product Description

DR Power Lawn & Garden Edger

Create Perfect Edges...Every Time!

If you are ready to graduate from handheld edging tools—as well as the arm fatigue and wobbly edges they so often produce—the DR Pro XL Lawn & Garden Edger is the tool for you. It features a 4-wheel platform that is much more stable than the more common 3-wheel models, and it's stacked with professional features!

A curb hop wheel (rear right wheel) allows you to straddle a curb, with wheels at both street and lawn levels, making it easy to track in a straight line and create precise cuts.

For edging around flower beds, the cutting blade pivots 15 degrees in either direction so you can make attractive bevel cuts for containing mulch. You'll get a manicured look that will enhance your landscaping, and make your lawn care efforts shine!

Product Summary

- Engine: 8.8 fpt (196cc), OHV
- 9" three-point edging blade
- Manual start
- 6 cutting depths (.5" to 3")

- 4 Wheel design (8" x 1.5")
- Weight: 73 lbs.

Warranty Coverage

- Machine: 2 years residential, 90 days commercial
- Engine: 2 years residential, 90 days commercial

Features

9" Three-Point Edging Blade Triangular 3-point blade offers versatile cutting power. Don't settle for flimsy blades that may require multiple passes, or a string edger that may never cut through to the roots!

Adjustable Edging Depth Depth control is right at your fingertips, with fixed positions from .5" down to 3". In areas that haven't been edged before, start high and make a second pass at a deeper setting to cut into roots and minimize regrowth.

Professional Curb Hop Feature An adjustable wheel allows the DR to straddle a curb, with one wheel at street

level, and track with perfect stability to create clean, precise cuts. Now that's curb appeal!

9" Three-Point Edging Blade Triangular 3-point blade offers versatile cutting power. Don't settle for flimsy blades that may require multiple passes, or a string edger that may never cut through to the roots!

4 Wheels for Maximum Stability Many wheeled edgers have only 3 wheels which can often create a wobbly ride...and that can show up in a wobbly edge. Handheld edgers are even worse. Professionals insist on 4 wheels for maximum stability.

Powerful DR Engine With Overhead Valve and plenty of power (196cc), our DR engine has plenty of muscle for cutting edges, even in tough clay soil.
