Product Description

Dr Power PILOT 200 Leaf and Lawn Vacuum LL31227DMN

The PILOT 200 model gives you all the amazing suction power you'll find on our larger models with a simplified collector and unloading mechanism. The underlying frame can also be used as a flatbed trailer (rather than the cart-style trailer found on the other models).

The 200-gallon collector can be fully unloaded in two easy steps: 1) simply unbuckle the closures on the back, and 2) release the lock lever from the front and tilt the entire collector to the rear. The steep dump angle ensures that the load empties completely.

With the collector removed, you can use the PILOT 200 as a flatbed trailer to haul all sorts of loads around your property. It's perfect for stackable and tie-down items.
